

Dataset Download and Usage

1. IPC to BNS Transformation Dataset

The **IPC_and_BNS_transformation** dataset was downloaded from the Hugging Face platform. This dataset contains mappings between Indian Penal Code (IPC) sections and Bharatiya Nyaya Sanhita (BNS) sections. It was used in the project to convert IPC sections into their corresponding BNS sections and provide updated legal references.

- Download Link: [IPC and BNS transformation Dataset](#)
- Platform: [Hugging Face](#)

Steps to Download

1. Open the dataset link.
2. Click on the “**Use this dataset**” option.
3. Copy the provided dataset loading code or download the dataset files manually.
4. Import the dataset into the project using Python libraries such as datasets or pandas.

Sample Code Used

```
from datasets import load_dataset
```

```
dataset = load_dataset("nandhakumarg/IPC_and_BNS_transformation")
```

Usage in Project

- IPC to BNS section mapping
- Legal section conversion
- Query-based legal reference generation
- Updated Indian law support

2. Supreme Court Judgments Dataset (1950–2024)

The **Legal Dataset: SC Judgments India (1950–2024)** was downloaded from Kaggle. This dataset contains Supreme Court judgment documents collected from Indian Kanoon and was used for legal text analysis, case summarization, retrieval, and model evaluation.

- Download Link: [Legal Dataset: SC Judgments India \(1950–2024\)](#)
- Platform: [Kaggle](#)

Steps to Download

1. Open the Kaggle dataset link.
2. Login with a Kaggle account.
3. Click on the **“Download”** button.
4. Extract the downloaded ZIP file.
5. Load the dataset into the project using Python for preprocessing and training.

Sample Code Used

```
import kagglehub

path = kagglehub.dataset_download(
    "adarshsingh0903/legal-dataset-sc-judgments-india-19502024"
)

print("Dataset Path:", path)
```

Usage in Project

- Legal judgment analysis
- AI-based case summarization
- Legal information retrieval
- Model training and evaluation
- Testing NLP-based legal assistant features
